

BlueLine

Moon Light

DeepWater

Thank you for choosing the BlueLine DeepWater MoonLight. We believe this unit provides one of the finest sources of artificial moonlight available for aquarium use.

Mounting instructions:

Your Deepwater MoonLight includes mounting screws that need to be fastened to an aluminum reflector. This high intensity moon light creates heat that needs to be dissipated away from the unit. Failure to properly attach to a reflector may cause premature burnout, and will void the warranty.

Even though the DeepWater MoonLight features a water resistant light housing the unit should not be submerged in water.

The moonlights are not dimmable and are not meant to be used with the Solar dimmers, but can be used with any standard timer.

BlueLine warrants that this product shall be free from defects in construction and materials and will conform to specifications current at the time of shipping. This warranty will extend 12 months from the date of purchase. During the warranty period, BlueLine will repair or replace any defective unit on a RETURN TO CHAMPION LIGHTING basis.

This warranty applies only to products properly installed and operated. BlueLine's responsibilities do not extend to the following:

- Any product that has been opened, repaired, worked on or altered.
- Any product subjected to misuse, negligence or accidental damage.
- Any product that has been improperly installed or operated outdoors without an enclosure.
- Any product subjected to water damage.
- Any product that has been linked to a Solar dimmer.
