

BlueLine

Moon Light

Thank you for choosing the BlueLine MoonLight. We believe this unit provides one of the finest sources of artificial moonlight available for aquarium use.

Mounting instructions:

Your MoonLight includes mounting screws and double-sided tape. If using the tape, be sure to clean all mounting surfaces with isopropyl alcohol. Make sure that the tape is in the final correct position before attaching the moonlight unit, as the tape will hold fast and may be difficult to remove. When using the screws, make sure not to overtighten the unit, too much pressure may crack the housing and/or crush the wires.

Your MoonLight is not meant to be mounted within 12" of any metal halide lamp or comparable heat source. Even though the MoonLight features a waterproof light housing the unit should not be submersed in water.

The moonlights are not dimmable and are not meant to be used with the Solar dimmers, but can be used with any standard timer.

BlueLine warrants that this product shall be free from defects in construction and materials and will conform to specifications current at the time of shipping. This warranty will extend 12 months from the date of purchase. During the warranty period, BlueLine will repair or replace any defective unit on a RETURN TO CHAMPION LIGHTING basis.

This warranty applies only to products properly installed and operated. BlueLine's responsibilities do not extend to the following:

- Any product that has been opened, repaired, worked on or altered.
- Any product subjected to misuse, negligence or accidental damage.
- Any product that has been improperly installed or operated outdoors without an enclosure.
- Any product subjected to water damage.
